LIST OF CONTENTS

NUMBER 1

H. Choi 1 A fast-running fuel management program for a CANDU reactor

J.S. Cassell and **M.M.R. Williams** 11 The infinite medium Green's function in space and angle for the integro-differential form of the neutron transport equation with isotropic scattering

B. Morillon 21 Resonance parameters perturbation with Doppler broadening in Monte Carlo neutron transport problems

J.K.-H. Karlsson, I. Pázsit 43 An analytically solvable, axially non-homogeneous reactor model
II. Reactor kinetic approximations

H. van Dam 63 Long-term control of excess reactivity by burnable poison in reflector regions

A. Gandini, M. Salvatores and **I. Slessarev** 71 Balance of power in ADS operation and safety

Technical notes

Y. Ronen, M. Aboudy and **D. Regev** 85 A nuclear engine design with ^{242m}Am as a nuclear fuel

K. Ryu and **H. Sekimoto** 93 Basic study of concentrically zoned fast reactor using natural uranium highly efficiently without fuel reprocessing

NUMBER 2

W.D. Sharp and **E.J. Allen** 99 Stochastic neutron transport equations for rod and plane geometries

H. Song, Y.-I. Kim, T.-K. Kim, Y.-I. Kim and **S.-J. Kim** — 117 Evaluation of core nuclear analysis code system for LMR using measured physics parameters of BFS-73-1 critical assembly

H. Roushdy — 133 Derivation of modified approximate analytical formulae for calculating the direct and adjoint flux weighted resonance integrals using a variable neutron spectrum

M.M.R. Williams — 143 The effect of random geometry on the criticality of a multiplying system

D.L. Aldama and **A. Trkov** — 169 Analysis of the burnup credit benchmark with an updated WIMS-D library

A.O. Goltsev, V.D. Davidenko, V.F. Tsibulsky and **A.A. Lekomtsev** — 175 Computational problems in the calculation of temperature effects for heterogeneous nuclear reactor unit cells

185 Book reviews

NUMBER 3

K.M. Leigh and **R.T. Ackroyd** — 187 Obituary: Cedric Euan Iliffe O.B.E., E.R.D., M.A., C.Eng., F.I.Mech.E.

M. Pitts, F. Rahnema, T.G. Williamson, F. Trumble and **R.E. Rothe** — 191 Experiments of water-moderated plutonium metal arrays: part I — description

M. Pitts, F. Rahnema, T.G. Williamson and **F. Trumble** — 207 Experiments of water-moderated plutonium metal arrays: part II — analysis

M.M.R. Williams — 233 Neutron density fluctuations due to randomly distributed sources in finite media

C.J. Jeong and **H. Choi** — 269 Xenon transient analysis for direct use of spent pressurized water reactor fuel in CANDU reactors (DUPIC)

NUMBER 4

H. Yapıcı, O. Ipek, V. Özceyhan, A. Erişen	279	Analysis of the rejuvenation performance of hybrid blankets by using uranium fuels (UN, UC, UO_2, U_3Si_2) and different coolants for various volume fraction
Y.S. Choi, J.S. Kim and **B.W. Lee**	295	Public's perception and judgment on nuclear power
S.R. Malkawi and **N. Ahmad**	311	Prediction and measurement of neutron energy spectrum in a material test research reactor
G.S. Srinivasan, O.P. Singh and **R. Prabhakar**	329	Leak noise detection and characterisation using statistical features
C.H. Pyeon, Y. Yamane, T. Misawa and **S. Shiroya**	345	Application of modified explicit higher order perturbation (MHP) method to PWR core analysis
O.M. Zamonsky, G.C. Buscaglia and **Y.Y. Azmy**	355	A posteriori error estimation for the one-dimensional arbitrarily high order transport-nodal method

NUMBER 5

M.L. Buzano, S.E. Corno and **F. Mattioda**	371	Kinetics of two phase fuel reflected reactors
V.G. Toshinsky, H. Sekimoto and **G.I. Toshinsky**	397	A method to improve multiobjective genetic algorithm optimization of a self-fuel-providing LMFBR by niche induction among nondominated solutions
D.C. Sahni and **A. Sharma**	411	Computation of higher spherical harmonics moments of the angular flux for neutron transport problems in spherical geometry
S.J. Kim, N.Z. Cho and **Y.J. Kim**	435	A pan-shape transuranic burner core with a low sodium void worth
C. Pereira, E.M. Leite and **E.F. Faria**	449	Waste analysis generated by alternative reprocessing fuels from pressurised water reactors

NUMBER 6

S.T. Khericha 465 Development of one-energy group, two-dimensional, frequency dependent detector adjoint function based on the nodal method

M.O. Allagi and **J.D. Lewins** 483 Variational processing of stochastic simulation in neutron transport: the three-dimensional system

N. Morishima 505 Cold and thermal neutron scattering cross sections of liquid H_2 and D_2 at temperatures between melting and boiling points

M.M.R. Williams 517 The effect of random geometry on the criticality of a multiplying system II: Extension to resonance absorption

Technical note

N. Ashoub and **H.G. Saleh** 553 Neutronic evaluation of two proposed fuel lattice pitches for ET-RR-1 reactor

NUMBER 7

A.K. Popov, Yu. N. Pepelyshev and **E.A. Bondarchenko** 563 The model of the IBR-2 pulsed reactor of periodic operation for investigations of transitional processes

Y.S. Choi, S.H. Lee and **B.W. Lee** 575 Expert judgment for nuclear energy

A. Novelli 589 The AMEBA PWR, a new concept in the technology of nuclear reactor safety

M.O. Allagi and **J.D. Lewins** 607 Higher-order variational perturbation expressions in fixed source problems using Monte Carlo trial functions

T. Miura, M. Baba, M. Ibaraki, T. Sanami, T. Win, Y. Hirasawa and **N. Hirakawa** 625 Measurement of neutron inelastic scattering cross-section for the first level of ^{238}U in hundreds of keV range

M. Marseguerra and **E. Zio** 639 Monte Carlo biasing in reliability calculations with deterministic repair times

F. Adorján, T. Czibók, S. Kiss, K. Krinizs and **J. Végh** 649 Core asymmetry evaluation using static measurements and neutron noise analysis

NUMBER 8

W.J. Park, M.H. Han and **K.J. Lee** 659 Analysis of the distributional effects of radioactive materials on external gamma exposure

R.C. Raichura 673 A working model for particle deposition in turbulent flow

A.S. Ivanov and **D.A. Ivanov** 697 Some peculiar features for kinetics of fission gas release from nuclear fuel on fast heating up

D. Yu and **W.S. Park** 713 Combination and evaluation of expert opinions characterized in terms of fuzzy probabilities

T.H.J.J. van der Hagen, R. Zboray and **W.J.M. de Kruijf** 727 Questioning the use of the decay ratio in BWR stability monitoring

H. van Dam 733 Long-term control of excess reactivity by burnable particles

Technical note

A.M. El-Messiry 745 ETRR-2 control rod withdrawal accident

757 Book review

NUMBER 9

M. Caner and **E.T. Dugan** 759 ThO_2–UO_2 annular pins for high burnup fuels

M.A. Feltus and **W.S. Miller** 771 Three-dimensional coupled kinetics/thermal-hydraulic benchmark TRIGA experiments

K. Hashimoto, H. Ikeda and **T. Takeda** 791 Numerical instability of time-discretized one-point kinetic equations

M.M.R. Williams 805 Probabilistic methods in heterogeneous neutronic systems

C.K. Jo, N.Z. Cho and **Y.H. Kim** 819 Graphite-filled mixed-oxide fuel design for fully loaded PWR cores

C. Yıldız 831 Variation of the albedo and the transmission factor with forward and backward scattering in neutron transport theory—the F_N method

Technical note

N. Ashoub and **E. Amin** 841 Detailed evaluation of ET-RR-2 neutronic design: approach to criticality

NUMBER 10

S.Y. Kim and **J.K. Kim** 855 A reactivity hold-down strategy for soluble boron free operation by introducing Pu-238 added fuel

L. Ali Khan, N. Ahmad, M.S. Zafar and **A. Ahmad** 873 Reactor physics calculations and their experimental validation for conversion and upgrading of a typical swimming pool type research reactor

C.-J. Jeong and **H. Choi** 887 Instability analysis on xenon spatial oscillation in a CANDU-6 reactor with DUPIC fuel

J.S. Cassell and **M.M.R. Williams** 901 Analytic solution of algebraic equations associated with the source–sink method of reactor lattices

J.H. Moon, C.S. Kang and **J.H. Whang** 935 A pattern-matching model for operator cognitive behaviors during accident conditions at a nuclear power plant

Technical note

F. Yousefpour and **M.B. Ghofrani** 949 Improvement of the axial power distribution control capabilities in VVER-1000 reactors

NUMBER 11

R. Koohi-Fayegh, M.H. Abad, S. Green and **M.C. Scott**	959	Neutron spectrum measurements from 1–16 MeV in beryllium assemblies with a central D–T neutron source
D.K. Mohapatra and **P. Mohanakrishnan**	969	Moderator temperature effect on reactivity in light water moderated experimental reactors
J. Solís-Rodarte, M. Ceceñas-Falcón, K.N. Ivanov, A.J. Baratta and **R.M. Edwards**	985	TRAC-BF1/NEM stability methodology for BWR core wide and regional stability analysis
G. Vladuca, M. Sin and **C.C. Negoita**	995	Neutron cross-sections of ^{238}U in the energy range 0.01–5.5 MeV
K.H. Bae, H.S. Lim, J.H. Song, S.K. Sim and **J.K. Park**	1011	Design options for the safety injection system of Korean next generation reactor
V. Gopalakrishnan	1029	Temperature dependence of unshielded cross-sections in multigroup cross-section sets
A. Yamamoto and **T. Kimoto**	1039	Effect of core calculation models on optimum cycle length analyses of pressurized water reactors

NUMBER 12

H. Fu, J. Solis-Rodarte and **K.N. Ivanov**	1051	TRAC-BF1/NEM Modeling and results of OECD/NEA BWR core transient benchmarks
W. Hwang, B.-O. Lee and **Y.J. Kim**	1059	Recent improvements in modelling fission gas release and rod deformation on metallic fuel in LMR
W.T. Hwang, M.H. Han and **G. Cho**	1071	A methodology for determining optimal durations for the use of contaminated crops as fodder following a nuclear accident using a dynamic food-chain model
J.L. Muñoz-Cobo, R.B. Perez, T.E. Valentine, Y. Rugama and **J.T. Mihalczo**	1087	A stochastic transport theory of neutron and photon coupled fields: neutron and photon counting statistics in nuclear assemblies

V. Gressier, D.G. Naberejnev and **C. Mounier** 1115 The impact of the harmonic crystal model on the neutron resonance parameters of ^{237}Np

K. Ishitani and **Y. Yamane** 1131 Estimation of fuel concentration distribution and subcriticality by using "pattern matching" method

Technical note

K. Ryu and **H. Sekimoto** 1139 A possibility of highly efficient uranium utilization with a pebble bed fast reactor

NUMBER 13

A. Gandini, M. Salvatores and **I. Slessarev** 1147 Coupling of reactor power with accelerator current in ADS systems

R. Sanchez 1167 On the singular structure of the uncollided and first-collided components of the Green's function

G. Vladuca and **A. Tudora** 1187 High accuracy average prompt fission neutron multiplicity description in the improved Los Alamos model

Y. Kitamura, T. Misawa, H. Unesaki and **S. Shiroya** 1199 General formulae for the Feynman-α method with the bunching technique

R.D.M. Garcia 1217 An analysis of the source-function integration technique for postprocessing P_N angular fluxes

C.H. Pyeon, Y. Yamane, T. Misawa and **S. Shiroya** 1227 Higher order perturbation calculation with higher mode eigenfunctions in homogeneous system

Technical note

H. Yapıcı, S.O. Akansu and **V. Özceyhan** 1237 Neutronic analysis of a moderated (D, T) fusion driven hybrid blanket

NUMBER 14

S.B. Degweker 1245 Some variants of the Feynman alpha method in critical and accelerator driven sub critical systems

H.-J. Cho, K. Kobayashi, S. Yamamoto, Y. Fujita, Y. Lee, G. Kim, I.S. Ko, M.-H. Cho, W. Namkung and **S.K. Ko** 1259 Measurement of neutron total cross-sections of Dy and Hf in the energy region from 0.002 to 100 keV

W.-J. Cho, J.-O. Lee and **C.-H. Kang** 1271 Influence of temperature elevation on the sealing performance of a potential buffer material for a high-level radioactive waste repository

N. Zavaljevski and **A. Shapiro** 1285 A Markov chain Monte Carlo inverse procedure for radioactive contaminant transport in fractured rock: 1. Forward model

N. Zavaljevski and **A. Shapiro** 1303 A Markov chain Monte Carlo inverse procedure for radioactive contaminant transport in fractured rock: 2. Inverse model

Technical notes

D.N. Ziabletsev and **K.N. Ivanov** 1319 Improved verification methodology for TRAC-PF1/NEM using NEA/OECD core transient benchmarks

A.H. El-Kateb, R.A.M. Rizk and **A.M. Abdul-Kader** 1333 Determination of atomic cross-sections and effective atomic numbers for some alloys

NUMBER 15

J.L. Muñoz-Cobo, O. Roselló, R. Miró, A. Escrivá, D. Ginestar and **G. Verdú** 1345 Coupling of density wave oscillations in parallel channels with high order modal kinetics: application to BWR out of phase oscillations

J.-S. Cheong 1373 An analytical prediction on the pump-induced pressure pulsation in a pressurized water reactor

I. Pázsit and **V. Arzhanov** 1385 Linear reactor kinetics and neutron noise in systems with fluctuating boundaries

W.I. Ko, H.D. Kim, M.S. Yang, H.S. Park and **K.J. Lee** 1399 Electrical circuit model for quantifying the proliferation resistance of nuclear fuel cycles

Technical note

A.M. El-Messiry 1427 Reactivity accidents analysis during natural core cooling operation of ETRR-2

NUMBER 16

S. Perov, E. Altstadt and **M. Werner** 1441 Vibration analysis of the pressure vessel internals of WWER-1000 type reactors with consideration of fluid–structure interaction

J.H. Kim and **P.H. Seong** 1459 A methodology for the quantitative evaluation of NPP fault diagnostic systems' dynamic aspects

M.A. Atalay 1483 Milne problem for linearly anisotropic scattering and a specularly reflecting boundary

H. van Dam 1505 Self-stabilizing criticality waves

F. Mattioda, P. Ravetto and **G. Ritter** 1523 Effective delayed neutron fraction for fluid-fuel systems

M.M.R. Williams 1533 Book reviews

NUMBER 17

1535 Memories of Ivan Kuščer 1918–2000

P.E. Labeau 1543 A variational principle in probabilistic dynamics

M. Marseguerra and **E. Zio** 1577 System unavailability calculations in biased Monte Carlo simulation: a possible pitfall

J.B. Taylor and **K.N. Ivanov** 1589 Statistical methods used for code-to-code comparisons in the OECD/NRC PWR MSLB benchmark

A.F. Dias and **R.D.M. Garcia** 1607 Coupled scalar and vector P_N methods for solving multigroup transport problems in multislab geometry

NUMBER 18

J. Kwon and **A.T. Motta** 1627 Gamma displacement cross-sections in various materials

N.V. Kornilov, A.B. Kagalenko, V.Ya. Baryba, V.G. Demenkov, S.V. Pupko and **P.A. Androsenko** 1643 Inelastic neutron scattering and prompt fission neutron spectra for ^{237}Np

A. Tudora 1669 Neutron cross-sections of ^{242}Pu in the energy range 5–20 MeV

C. Housiadas 1683 Simulation of loss-of-flow transients in research reactors

M.M.R. Williams 1695 Transport theory corrections to the source-sink method for reactor lattice calculations
